Sreedevi Balaji

Senior Principal Product Manager | Agentic AI, Workforce & Talent Intelligence | AI Product Builder | Explainability, Governance and Responsible AI | Patent Holder (Three filed in AI/LLM) & Innovation Evangelist)
Greater Hyderabad Area

Summary

I build enterprise AI products that people can explain, govern, and trust. I took an AI and big-data eDiscovery platform from inception to release, growing revenue 25% and improving retention 20%. I’m a Senior Principal Product Manager for AI and Analytics at Providence Global Center, with 17+ years in technology and 11 in product management across banking and financial services, healthcare, and legal eDiscovery. In high-stakes domains, AI earns adoption when people can see its reasoning, so I design explainability, governance, and human-in-the-loop control into the product from day one. Proof:- I owned an eDiscovery and investigations platform end to end: an AI and big-data product built on proprietary analytics, machine learning, and automation. - Grew user engagement 40% and revenue 25% through product enhancements and strategic initiatives- Improved customer retention 20% by applying machine learning to the eDiscovery review process- Cut third-party service and revenue-sharing costs by migrating an internal business intelligence tool - Filed three patent applications as first inventor and co-inventor What I do now? I work where HR, engineering, and business leaders meet, turning ambiguous problems into AI products with a clear roadmap and measurable outcome. My work spans workforce, learning, and talent intelligence and enterprise agentic AI platforms, and I’ve led cross-functional teams of 25+.
- Responsible AI by design: explainable outputs, evaluation, and human review built in, such as an AI Evaluation Dashboard- Technical fluency: Azure AI Foundry, RAG, knowledge graphs, and MCP, enough to bridge business strategy and engineering- Fast prototyping: Lovable and Claude to put something real in front of leaders before engineering commits, including an AI-powered PRD builder Credentials: certifications from ISB, Duke, CSPO, SAFe Agilist, and Microsoft. Gold Medal and University Rank, University of

Madras. Always open to conversations on enterprise AI, workforce intelligence, and responsible AI product design.
